

CHARLES EDWARD MANILA

A: Purok 3, Brgy. San Francisco, Victoria, Laguna
M: +639935034137
E: charles.e.manila@gmail.com

To utilize my experience in Automations QA systems testing, freelancing, and programming skills to contribute to a company's success as a software developer and build high-quality software products.

TECHNICAL SKILLS

QA Testing	-Full lifecycle testing; Regression, Functional and E2E testing; Requirement analysis; Defect Management; Test scripting; Statistical Process Control (SPC); SQA testing and methodologies, Robot Framework, API Testing, Appium, AWS Lambda Testing	Robotics and Automation	Arduino; C++
Software development	-VB .net; C#; HTML; PHP Laravel; CSS; MySQL; SQL; MS SQL -Knowledge of software development life cycle (SDLC) -Familiarity with Agile methodologies	Version Control	Git

EXPERIENCE

July 2023– PRESENT
CARTERA

Job Description

The Quality Assurance Analyst is responsible for reviewing and analyzing system specifications, which are essential in planning, designing, and executing test cases for the company's software products. This individual will work closely with development and QA teams to ensure that software releases meet quality standards and are free from defects. Additionally, the QA Analyst will be involved in automating test processes using industry-standard tools and frameworks to improve efficiency and coverage in the testing cycle. This includes writing, maintaining, and executing automated test scripts to streamline regression testing and identify issues early in the development process.

Key Responsibilities:

- Define test plans, create test cases, and execute them for functional, integration, regression, and automated testing.
- Create, maintain, and execute automated test scripts using Robot Framework alongside detailed test scenarios, test cases, and manual test scripts, ensuring they align with the project's goals, agreed testing policy, and procedures.
- Automate repetitive and time-consuming test cases using Robot Framework and other industry-standard tools to improve test coverage and efficiency.
- Ensure work is properly logged, including automation logs, so regular quality reporting and status updates can be produced for assigned projects.
- Ensure all test results—manual and automated—are accurately recorded with the required documentation during all phases of test execution.
- Identify, analyze, escalate, and report test findings and/or defects, working closely with the development team to ensure resolution and automate defect retests using Robot Framework where applicable.
- Collaborate with development and QA teams to ensure that software releases meet quality standards, are defect-free, and incorporate automated testing with Robot Framework at appropriate stages of the development lifecycle.
- Stay up to date with the latest testing methodologies, automation tools (especially Robot Framework), and

technologies.

- Work closely with development teams to identify areas for improvement, particularly where Robot Framework automation can reduce manual testing efforts.
- Collaborate with other teams to ensure that software products, including automated test suites, are delivered on time and within budget.
- Communicate effectively with stakeholders and other teams, providing regular updates on both manual and Robot Framework automated testing progress.
- Analyze test results, log defects, and track their resolution, incorporating Robot Framework automated test results where applicable.
- Experience in testing APIs using Postman, including automating API test scripts for faster validation using Robot Framework.

JULY 05, 2021 – Feb 2023 (FULL TIME, PERMANENT)

MID SOFTWARE QUALITY ASSURANCE ENGINEER, YONDU INC., PHILIPPINE

Achievements and Task

- Create Test Cases
- Perform SIT and different Types of Testing
- Perform Test Automation (Robot Framework)

Projects:

Novadeci

Metrobank

- Collaborated with clients for certain projects
- did API Testing via Postman

FEB. 03, 2020 – MAY 30, 2021 (FULL TIME, PERMANENT)

QUALITY TEST ENGINEER, MAXSULIT TRADING INC.

Achievements and Task

- Create Test Cases
- Perform SIT and different Types of Testing
- Perform Test Automation
- Collaborated with Devs from China
- did API Testing via Postman
- Mobile Testing for all apps that are commonly used in the country
- Collaborated with different networks for Phone connectivity

JUNE 18, 2019 – JAN. 05, 2020 (FULL TIME, PERMANENT)

TEST ENGINEER, IONICS EMS INC.

Achievements and Task

- Create Test Cases
- Create a Program to automate certain process in a line
- Improved the production speed by incorporating proper test planning and troubleshooting of components

2017– 2022

FREELANCE PROGRAMMER

Achievements

- Projects delivered on time and within budget
- Positive feedback from clients, ability to meet their requirements and exceed their expectations.
- Increased client satisfaction and repeat business
- Growth in client base and the volume of projects handled
- Development and implementation of new processes and tools to improve efficiency and quality
- Skills and knowledge gained in areas such as project management, client relations, and technical expertise
- Solving complex technical issues and delivering innovative solutions to clients.

Projects (here are some of my projects and programming languages that I applied/learned)

- Automated Parking Lot System (Arduino and PHP Lavarel)
- School Management System with Biometrics and SMS Alert Notification (Arduino and PHP Lavarel)
- Pedestrian Warning Post (Arduino)

- Horizontal Bicycle Parking System
- Multiple Layer Home Security System with Flash drive as key and SMS Alert Notification (Arduino)
- Home Security System with Call Alert Notification and Camera Module (Arduino)
- Automated Plant Monitoring and Control System using GSM (Arduino)
- Voice Controlled Mixer Using Arduino Application (Arduino and .Net)
- Power Monitoring System (Arduino and .Net)
- Multiple Room for Rent Automation System with Timer and Extend Function (Arduino and .Net)
- Password Protected Home Automation System using IR Remote with SMS alert Notification (Arduino and .Net)
- Water Level Monitoring System through IOT (Arduino and .Net)
- Smart Solar Control and Monitoring System for Electricity Consumption with IOT (Arduino and .Net)

EDUCATION

JUNE 2019

BACHELOR OF SCIENCE IN ELECTRONICS ENGINEERING, AMA COMPUTER COLLEGE

STA CRUZ, LAGUNA

ACADEMIC EXCELLENCE ACHIEVEMENTS

• **Project Thesis “Smart Solar Panel Energy Controller”**

June 2018 -March 2019

- Awarded as “*BEST THESIS*”
- Automatically adjust power supplied by the solar panel system according to current power consumption to avoid additional charges from the electric power company.

• **Workshop Speaker**

June 2017

- Delivered presentation entitled “A Step towards World’s Innovation” to AMA Computer College students regarding breakthrough and innovation using ARDUINO programming.
